60 MINS. ACUPUNCTURE

Acupuncture is the most notable medical discovery from ancient Chinese medical tradition. Five thousand years of clinical experience from over hundreds of millions of people, acupuncture is now accepted worldwide as a therapeutic modality for pain, as well as for acute and chronic medical conditions. Based on Traditional Chinese Medicine philosophy, when the flow of qi (chi) in the meridians is sufficient and balanced, the body is in harmony and in order, but if the qi (chi) is blocked, deficient or stagnant, disease or illness follows. Fine, sterile disposable needles are inserted on specific acupoints on the skin to improve the flow of qi (chi) that flows along invisible meridians, or the network.
